## **DRY WALL AND TILE BACKER BOARD INSPECTIONS BULLETIN**

In an effort to streamline the building inspection process, the City of Atlantic Beach will no longer require a DRY WALL / TILE BACKER BOARD inspection.

Dry wall inspections are still required for FIRE WALLS and gypsum shear wall construction.

The dwelling/garage fire separation requirements, in FBC-R302.6, still apply.

Tile backer board must be installed to the Manufacturer's Installation Instructions.

Other Code Provisions regarding dry wall and tile backer board still apply, including, but limited to FBC-B, Chapters 7, 8, and 25; and FBC-R, Chapters 3 and 7.

The installation of dry wall and tile backed board will be verified during other inspections.
