12	You can ride your bike, or walk, everywhere! Beachside to marshside! You can do it safely, with your kids, you parents, your grandparents! We made our marsh and tree canopy PRIORITIES just like our beaches, and now they're another reason that people move and stay here. The houses are funky and cool (with plenty of trees), not McMansions. The Mayport Corridor is the place to be, keeping an industrial and diverse vibe while adding TREES, pedestrian and bike-friendly walkways, MORE AWESOME ART, restaurants, shops, and breweries. AB has built trails and green spaces on the marsh-side to accommodate the 1/2-foot of sea level rise the city has seen, turning the rise into an amenity rather than a catastrophe. Best of all, the trails and green spaces across the island (beachside to marshside) are finally fully connected under green canopies, along canals, and beside our awesome marsh and amazing beach.	10/20/2021 8:39 PM

454	Better tree planning. Seminole Rd., a main street of Atlantic Beach, is currently a hodgepodge of trees lining the street. Tree arbors are fine, but they can be a source of problems in storms and extremely wet weather. I often envision how dramatic Seminole Rd. would be with palms . They are low maintenance, tolerate storms well, cause no problems with leaves and look like Florida which is where we are. Mayport Rd. would be enhanced with palms and better kept business fronts.	9/24/2021 6:10 PM
